THAI CHI SAWADEE KAA!

We are Thai Chi Export, owners and operators of an independent durian packing house in Chumphon province, Thailand. **We have Thai durians for export at best quality** and wholesale prices to anywhere in the world.

PREMIUM FRUIT

DURIAN SEASON

Durian season in Thailand starts in March every year and ends somewhere in December. If that seems surprisingly long, that's because **Thailand is the world leader** durian exports. Whereas durian in other countries is only in season for 3-4 months, Thailand can produce durians almost all year round!

PREMIUM FRUIT

HARVESTING DURIAN

We harvest the fruits at **77-80% ripeness**, thus allowing them to fully ripen during their long journey overseas. Once harvested, we bring them to our packing house where each individual fruit is graded, separated, and packed for shipping. **Only the highest A and AB grade durians** are selected for export – the lower grades are priced cheaper and sold to local wholesale markets. Hence, if you want the best durians, you've got to get them from the source!

DURIAN GRADES

What separates **export-grade durian** from the lower grades? Here are the criteria:

- Has at least 4 "Pull" of flesh per fruit
- Thin shell, which equals more edible flesh (i.e. 35-40% flesh yield by weight)
- Bright, healthy-looking skin with no blotches or discoloration
- Harvested at the right level of ripeness
